

Over View

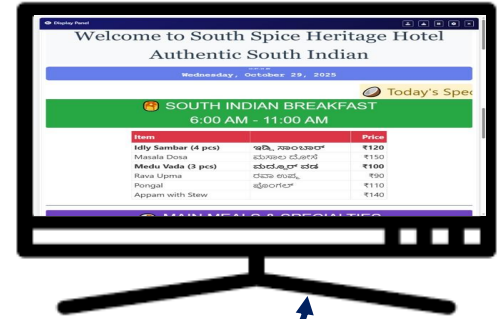

QuickIoT DigiBoard is a **next-generation Wi-Fi-enabled digital display system** designed to make information sharing smarter and simpler. With its **inbuilt web server**, users can **edit and update content instantly** from any smartphone or laptop — no external software or app required. From **production data and shift targets** to **announcements, alerts, and clock/date displays**, DigiBoard keeps your workspace **informed, connected, and up to date** at all times.

Features

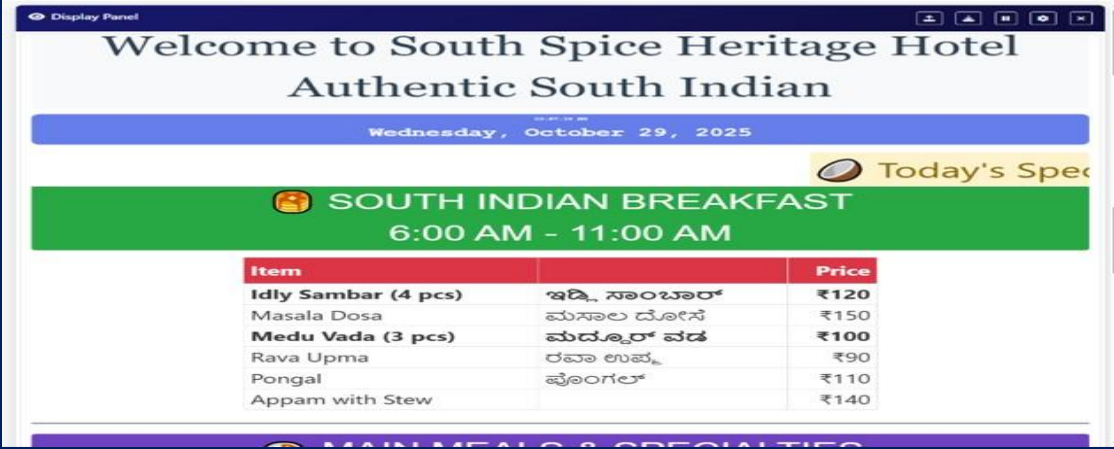

- **Smart Wi-Fi Connectivity** - Edit and update wirelessly in real time
- **Inbuilt Web Server** - Configure via any browser
- **Customizable Display** - Multi-language text, tables, clock/date
- **Real-Time Data Display**

Applications

- 🏭 Industrial Environments
- 🏢 Commercial & Corporate Spaces
- 🏛️ Institutions & Public Facilities
